Index to Volume 24 (1982) of IR&D

Bold type refers to issue numbers in Vol. 24 of Industrial Research & Development. Light numerals indicate page numbers.

—A—

Aberration coefficient **8**, 92.
Absolute novelty **6**, 39.
Absolute space **9**, 138.
Academic freedom **9**, 31.
Achievement of objectives **9**, 162.
Acid digestion process **2**, 72.
Acid mists **12**, 77.
Acid precipitation **9**, 59.
Acid rain **9**, 11, 59.
Acid rain monitor **6**, 80.
Acoustic emissions **12**, 74.
Acousto-optic modulation **12**, 70.
Acoustic microscopy **10**, 158.
Adhesives **2**, 106; **8**, 98.
Advanced optics **9**, 48.
Advanced processing technology **9**, 236.
Aeriel VI **5**, 60.
Aerodynamic particle sizer **10**, 131.
Aerodynamic turbulence **2**, 146.
Aerodynamics **6**, 51; **8**, 70.
Aerospace industry **9**, 80.
Age of relativity **9**, 140.
Agency clearing house **11**, 142.
Agent Orange **4**, 46.
Air conditioning **9**, 106.
Air Products & Chemicals Inc. **10**, 148.
Air show **11**, 94.
Air traffic control systems **1**, 145.
Aircraft accident **3**, 39.
Aircraft construction **6**, 51.
Aircraft designs **3**, 39; **6**, 51; **11**, 94.
Aircraft flight **3**, 59; **7**, 56.
Aircraft landing system **7**, 49.
Aircraft of the future **11**; 37.
Aircraft operation costs **9**, 40.
Aircraft safety **8**, 43.
Alarm systems **1**, 100.
Alcohol **1**, 33.
Aldehydes **5**, 144.
Aliens **3**, 59.
Aliphatic alcohols **5**, 144.
Alloy steels **12**, 80.
Alternate energy sources **6**, 51; **7**, 74; **9**, 39.
Aluminum **1**, 86; **2**, 102; **12**, 80.
Aluminum alloys **3**, 39.
Aluminum/copper recycling **9**, 48.
Aluminum flakes **6**, 104.
Aluminum recovery **6**, 56.
Aluminum reduction **12**, 96.
American Ceramic Society **4**, 43; **7**, 50.
American Engineering Association **3**, 48.
American Vacuum Society **5**, 48; **9**, 173, 184.
Ammonia **5**, 89.
Amnesia **2**, 25.
Amorphous photovoltaic devices **9**, 40.
Amorphous silicon **9**, 76; **10**, 44.
Amorphous studies **6**, 58.
Ampere force **12**, 96.
Analog-to-digital converter **10**, 119.
Analytical instruments **2**, 171; **4**, 11.
Ancestral shock **2**, 25.
Annealing system **10**, 132.
Antarctic continent **9**, 60.
Antares laser system **11**, 44.
Antimisting fuel **7**, 57.
Antimony Research Institute **4**, 43.
Antisatellite spacecraft **10**, 49.
Antitrust action **2**, 49.
Applications subroutines **11**, 126.
Applied science **10**, 87, 155.
Apollo 12 spacecraft **2**, 115.
Aqueducts **9**, 59.
Aramid **2**, 11.
Arco Chemical Co. **5**, 106.
Arctic-melt ice-age theory **5**, 48.
Argonne National Lab **10**, 112, 123, 127, 151.
Ariane rocket **6**, 69; **9**, 82, 89; **11**, 82.
Arms Export & Control Act **3**, 57.
Artificial intelligence **4**, 43; **12**, 44.
Asbestos **3**, 87.
Aspect ratio **6**, 104.
Astrometric techniques **7**, 64.
Astronomers **3**, 74; **7**, 64.
Asurf facility **12**, 37.
Atom cloud **4**, 53.
Atom-smashers **1**, 80.
Atomic absorption **2**, 156, 206; **3**, 150.
Atomic emission spectrometry **2**, 146; **3**, 3, 142.
Atomic fluorescence spectrometer **10**, 95.
Attitudes and emotions **5**, 162; **12**, 122.
Auger electron spectroscopy **8**, 86.
Aussat **7**, 41.
Australian research scheme **1**, 90; **4**, 58.
Auto bodies **7**, 94.
Auto racing **7**, 90.
Autocorrelator **10**, 168.
Automated HPLC **2**, 138.
Automated notebook **4**, 124.
Automated reasoning assistant **2**, 113.
Automated sampling **10**, 164.
Automobile battery **10**, 37.
Automobile fuel consumption **6**, 51.
Automotive industry **2**, 61.
Aviation **7**, 55.

—B—

Babcock & Wilcox Co. **10**, 115.
Backcut of injection **2**, 138.
Backstreaming **3**, 157.
Backward wave propagation **11**, 101.
Baird Corp. **10**, 95.
Ballhaus, Dr. William **7**, 50.
Ballistic missiles **10**, 49.
Ballistic testing **9**, 97.
Bar detector **3**, 83.
Barlow lens **2**, 201.

Engineer

RESEARCH AND DEVELOPMENT ENGINEER

World leader in commercial and industrial packaged boiler systems is currently seeking an innovative Research and Development Engineer.

Position responsibilities involve computer application and mathematical techniques used to solve non-linear fluid dynamics and thermal science problems concerning various boiler and burner research projects involving new product development and modifications of existing products as well as analysis of laboratory testing procedures. Position qualifications require a Master's degree in Mechanical Engineering with emphasis in computer applications of non-linear differential equations or five years of experience with boilers with emphasis on non-linear differential equations a must.

Salary will be approximately $26K with a complete benefit program including profit sharing. Interested applicants send resume and salary requirements to:

NEW...and only from Bethlehem

Prime virgin source mercury

Now, for the first time ever, prime virgin source mercury is available from Bethlehem. Continuously distilled three times under vacuum, the mercury is analyzed before and after distillation. It is thus ideal for research with stringent purity requirements where maximum controlled purity in the application of the element is desired.

Bethlehem's prime virgin source mercury is guaranteed to have less than 2ppm noble metals, and less than 1ppm base metals. (Detailed noble metal analysis is available upon request.) The mercury is packaged in Bethlehem's exclusive thimble-trap* glass bottles. Write or call for more complete information.
